

## Industrial Precision Oven Hinges ML2-003-2

2023-03-22

This is a heavy-duty hinge for use on industrial equipment such as industrial ovens, test chambers, and environmental test chambers. It has 6 mounting holes with oblong mounting holes for easy installation with minor adjustments. It is also equipped with a dustproof cover plate, which can be put on after installation to provide a good aesthetic effect. And there are nylon spacers added between the hinge blocks to the role of cushioning and improving the service life.
