

## Heavy Duty Hinges for High & low temperature test chambers ML2-001

2023-06-20

Heavy-duty hinges for high and low-temperature test chambers are hinges designed to withstand extreme temperature ranges, typically from -70°C to 180°C. These hinges are commonly used in environmental test chambers, such as those used for testing electronic components, aerospace materials, and automotive parts.

<b>Model</b>	ML2-001
<b>Material</b>	Zinc alloy
<b>Finish</b>	Bright chrome plating
<b>Thread or Hole Type</b>	Various specifications, please check the drawing
<b>Uses</b>	automation equipment, Chassis, industrial oven
<b>Weight</b>	Please check the drawing
